Manual Editors: Theresa Price
Cheryl MacNabb

Created in Canada, April 1999

Author's Notes

Firstly, I would like to extend a welcome back to our MasterISO Version 1 users. Thank you for your support over the years. Secondly, a hello goes out to all of our new MasterISO Version 2 users.

MasterISO is **THE** definitive CD-R/RW mastering software package for the Amiga. Asimware Innovations Inc. has been producing CD-R/RW mastering software for the Amiga since 1993. Our dedication to quality and customer service is unsurpassed.

I feel that you will be greatly surprised with all of the advancements and features we have added to Version 2.

At this time I would also like to thank a few people who have made MasterISO Version 2 and this manual possible:

Firstly, our extensive list of beta testers around the world who put up with us through numerous beta versions and late night ramblings on the beta mailing list. If you need coasters, I could give you their names. They will probably have a few.

To Jay Miner and the visionaries who created this wonderful machine known as the Amiga.

To Tammy for her wonderful home-made goodies which I happened to finish most nights in the wee hours of the morning.

To Warren Block for allowing me to use his expertise for the SCSI section.

To our editors, Theresa and Cheryl, for putting up with my bad grammar and dangling prepositions.

Lastly, I would like to thank all of you, the users. Without your support and dedication to Asimware and the Amiga, we wouldn't be able to produce our suite of software.

Therefore, without further adieu, I am happy to present to you, the MasterISO Version 2 Users Manual.

If you have any suggestions as to how to make future revisions of this manual even better, please feel free to let me know.

Thank you all and I hope you enjoy using MasterISO Version 2.
