

Pixload Version 1.77 (by Pixel Art Asc.)

DESCRIPTION

This little "bar" allows to you load any program or script by one click on icon. A bubble help tells you the name of loaded program. Three help files (GUIDE, HTML and PDF) are available.

News : Pixload has now a quick loading message window for each program

What about :

It is a window with buttons including pictures. Each click on button, loads a command line which loads a program or script. It was made in AREXX and RXMUI for graphic part. You can modify everything (colors, aspect, etc.. from the Pixload contextual menu).

INSTALLATION

Click on "Install-Pixload" (you must have INSTALLER in your C folder)

You must install BEFORE :

- MUI (version 3.8)
- RXMUI (version 27.x - [Http://web.tiscali.it/amiga/rxmui/english/index.html](http://web.tiscali.it/amiga/rxmui/english/index.html))
- Rexxmast (in your system folder from Workbench)

CONFIGURATION

There are 3 elements to configure :

- Icons (in Pixload/icones folder). First color of icon will be TRANSPARENT !!!
- (look at Mui documentation). You can configure MUI from Pixload contextual menu : prefs files are located at SYS:prefs/env-archive/mui and RAM:Env/mui

The Pixload which loads the configuration program

- Click on Pixload.prefs in the Prefs folder
 - Choose if you want to display Pixload horizontally
 - Choose if you want sound or not
 - Choose numbers of icons
 - Choose yours programs and fill the bubble help
 - Choose sounds and listen to it
- Buttons located after icon precise if : the file is a program (by default) or a script (button pushed)

Example : to launch DOPUS, don't use this option, to launch a command : "lha x -x ram: etc..... " from file, use this option

That's all, the graphic interface from MUI, is available from the Pixload contextual menu.

ERROR :

If you have got this message : "Arithmetic conversion error" or 'Speedbar" : It means :

- One or more of icon is mislocated
- An path is not validated in Pixload
- The access to files are not correct
- A " or ' or) is missing in a command line
- You have got an old RXMUI version

An RXMUI update is available at : <http://web.tiscalinet.it/amiga/rxmui>

AUTHORS

It was made in Arexx and RXMui by Pixel Art - <Http://www.Pixel-Art.fr.st>
Rmxui was made by Alfonso Ranieri - <Http://web.tiscalinet.it/amiga>

(thanks to Polymère and Bernd Gollesch and also Alfonso Ranieri)
